Odontoglossum grande (The Tiger Orchid)

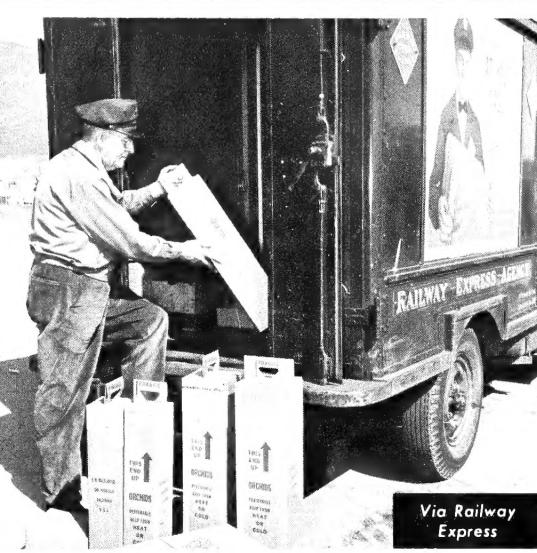

McLellan Orchids 1951

Shipping

Shipments are sent via Express wherever practicable, unless otherwise requested. Modern shipping by air makes it advisable to ship out of pot in some instances and in all shipments of short duration when the plants are not in bud or bloom.

By careful packing, we are shipping our plants successfully to all parts of the United States and to those foreign countries where international trade permits. However, we are not responsible for the safe arrival of the plants. Once the plants are accepted by the carriers, they are responsible for the shipment. Examine the plants carefully upon their arrival, and file an immediate claim with the express company if there is the slightest indication of damage. The express company must see the plants immediately to have a claim considered. We will gladly replace any damaged plants, but the claim must be filed to permit us to be reimbursed by the express company.

Conditions of Sale

SUBJECT TO PRIOR SALE: Orders are filled in the order of receipt. If possible, list an alternate choice to avoid delay, as we make no substitutions unless given specific permission to do so.

PRICES SUBJECT TO CHANGE: In these modern times, prices are subject to change.

CREDIT: Until credit is established, all purchases are CASH or C.O.D.

SALES TAX: California customers, please add 3% State Sales Tax.

PRICES F.O.B. SAN FRANCISCO.

Quantity Discounts

On quantity purchases, we are offering the following discounts:

\$50.00 to \$250.00	10%
\$250.00 to \$1000.00	20%
Over \$1000.00	30%

Policy

It is our policy to give all the information that we have on anything that we sell.

We will gladly accept membership applications for the American Orchid Society, Botanical Museum of Harvard University, Cambridge 38, Mass., or for the California Orchid Society, 697 Arlington Avenue, Berkeley 7, California.

Orchid Growers - Exporters, Importers, Hybridizers

This catalog has listed those seedlings, crosses, and plants that are of extreme interest to the commercial man or the amateur with a large collection, but more and more we have tried to make our listings understandable to those thousands of new orchid enthusiasts who need a source of materials for their small hobby, carried on within their own homes. Thus, the last part of the catalog is devoted almost entirely to those things of interest to the new enthusiast.

We as professional growers have seen a migration of orchid culture during the past decade from the conservatories of the very wealthy to the window sills of the living rooms, or even the bedrooms of anyone with a modern, evenly heated home, and rightly so. People everywhere are finding orchid plants as easy to grow—or even easier—than any of the potted plants they have been growing indoors for years.

With this in mind, we are listing on the following pages a fine group of orchid plants suitable not only for the commercial men, but for the home growers as well—those with greenhouses and many plants, or those with one or two plants, or perhaps no plants at all, but just a wish to acquire one or two to grow on a strategically located window sill somewhere about the house.

Whatever size plants you wish to order, from tiny seedlings up to mature, flowering-size plants, you will find McLELLAN ORCHIDS are top quality, reasonably priced, and in perfect growing condition.

We feel sure you will be more than satisfied with the shipments we make to you—the packing, the shipping, the price, the plants. We shall enjoy any opportunity to serve you in any way.

ORCHIDS BLOOMING IN THE LIBRARY

A McLELLAN COMMUNITY POT

McLellan Communities

Our 3" community pots of cattleyas are planted with 20 or more seedlings, but our communities of odontoglossums will have 10 or more seedlings from transplanted flasks. All are about ready to be shifted to thumb pots (1½"), and are sturdy, vigorous-growing stock.

The accurate description of the flower of both parents used in the crosses will help you to make your selections.

Some of the crosses listed below will be available as communities for a limited time only. On orders placed for lower cross numbers after July 1, 1951, we suggest you write us to check on availability and avoid disappointment, or give us the permission to substitute similar crosses.

Cross No.	Description	Price (Per pot of 20)
365—C. JEVAN	Petals 7½" x 3¼". Rosy dark lavender, labellum bright magenta with gold eyes in the throat—April	\$ 8.50
C. TITYUS	Petals 7¼" x 2¾", rose mauve, labellum bright purple with golden yellow throat—March.	
	Purpose: Should give a winter flower of good production.	
429—C. MOSSIAE	Petals 7¾" x 2¾", bright lavender with darker labellum, very little yellow in throat—April.	8.50
Blc. J. K. LILLY	Petals 6¾" x 3", dark lavender, labellum clear magenta with unveined, magenta throat—October.	
	Purpose: To get an improved Mossiae-type hybrid for spring production.	
494—C. COWANIAE	Petals 8½" x 2¾", lavender with darker labellum. Golden orange eyes in the throat—May.	8.50
Lc. NYMPH v. colossus	Petals 9½" x 3½". Darker lavender, magenta labellum, yellow eyes in throat—June.	
	Purpose: Spring and summer flowering, this cross should be an excellent producer.	

Cross No.	Description	Price (Per Pot of 20)
533—Bc. DORIS	Petals 7" x 2½", dark lavender with a dark labellum, yellow-green eyes in throat—October.	\$ 8.50
X		
Lc. NYMPH	Petals 8¾" x 3", darker lavender petals and sepals with a dark magenta labellum, yellow-green throat—July.	
	Purpose: A large flowered brasso-type cattleya of good color. Lc. Nymph should give exceptional strength to the plant.	
536—Blc. J. K. LILLY	Petals 7½" x 3¼", lavender with magenta labellum, light edge. Gold eyes in throat—December.	8.50
X		
Lc. NYMPH	Petals 8¾" x 3", dark lavender with dark magenta labellum, yellow-green throat—July.	
	Purpose: Flowers should be very large with good shape, and should retain only slight brasso characteristics.	
565—Lc. BABYLON	Petals 8¼" x 3½", medium lavender with light magenta labellum, light edge. Gold eyes and veins in throat—July.	8.50
X		
Lc. PRINCESS SOULANGE	Petals 6¼" x 2¾", dark lavender with purple veining in tips of the petals, magenta velvet labellum with gold veins in throat—October.	
	Purpose: Should produce a Sophrolaeliocattleya of large size and excellent shape with good growth habits.	
573—C. NEBO	Petals 8" x 3½", medium lavender, labellum magenta with yellow throat—December.	8.50
X		
Lc. KAREN	Petals 7" x 2¾", medium lavender, labellum deep magenta with gold eyes in the throat—October.	
	Purpose: Excellent commercial flower for Christmas production.	
574—C. NEBO	Petals 7¾" x 2¾", lavender, labellum magenta with yellow orange area in the throat—December.	8.50
X		
Lc. OLIVER LINES	Petals 7½" x 3", medium lavender with slight stripe in petals. Labellum deep Tyrolean purple with no yellow in throat—September.	
	Purpose: A Christmas hybrid of good color, good shape, and good texture.	
607—C. BANDIT	Petals 7¾" x 3", medium lavender, labellum magenta with a light edge, gold eyes in throat—November.	8.50
X		
Lc. HAIDEE	Petals 7¾" x 3¼", glowing rose purple, labellum intense velvety wine-red—November.	
	Purpose: Rich color should be the theme in this cross. Both parents bloom in the early winter.	
659—C. APALACHEE	Petals 8½" x 2¾", medium lavender, labellum magenta and gold—December.	8.50
X		
Lc. HERTHA	Petals 7" x 2¾", light lavender with magenta labellum, gold eyes and veins in throat—June.	
	Purpose: All crosses made with Lc. Hertha have good color and texture, with remarkable shape.	
682—C. ALESSANDRO	Petals 7½" x 3", medium lavender, labellum purple with light bronze throat—June.	8.50
X		
Lc. CUESTA	Petals 7" x 2¾", rose magenta, labellum deep crimson purple—February.	
	Purpose: This cross should produce well for the winter season. Alessandro with its excellent production, and Cuesta with its rich color should make a good winter cut flower.	
700—Lc. ATLANTIS	Petals 8½" x 3", rose mauve, labellum warm crimson purple—October.	12.50
X		
C. PROSPECTOR v. NANCY ANNE	Petals 6¾" x 3", rose lavender, labellum crimson with yellow throat area—March.	
	Purpose: Lc. Atlantis is a perennial favorite with us. It consistently produces fine flowers on long stems, and combined with a good Cattleya Prospector, results should be outstanding.	

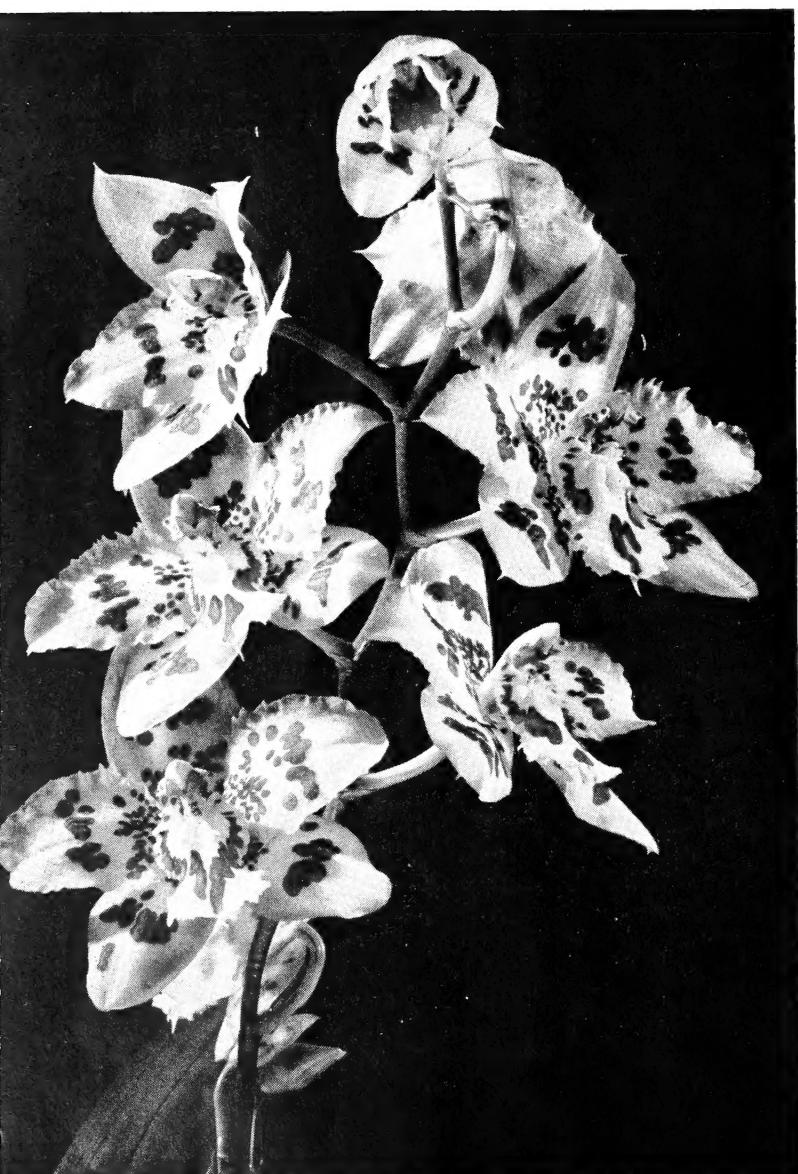

Cross No.	Description	Price (Per Pot of 20)	Cross No.	Description	Price (Per Pot of 20)
704— C. TELLUS	Petals $7\frac{1}{2}$ " x 3", medium rose lavender, labellum deep magenta with large yellow throat area—January.	\$ 8.50	860— C. DOWIANA aurea	Petals $6\frac{1}{2}$ " x $2\frac{3}{4}$ ", Nankeen yellow, with rich crimson purple, labellum streaked and lined with old gold—July.	\$12.50
X			X		
Lc. HERTHA	Petals 7" x $2\frac{3}{4}$ ", light lavender with magenta labellum, gold eyes and veins in throat—June.		Lc. S. J. BRACEY	Petals $6\frac{3}{4}$ " x $2\frac{1}{2}$ ", bronze-yellow, labellum rosy red with yellow veins—July.	
Purpose: Should produce vigorous growers bearing large, heavy textured flowers with yellow eyes in throats.			Purpose: This is a remake of a proven cross, producing flowers from green-yellow to deep bronze with red lips.		
723— C. BARBARA BILLINGSLEY	Petals $6\frac{3}{4}$ " x $2\frac{5}{8}$ ", pure white, labellum white with lemon yellow throat—December.	8.50	881— Lc. S. J. BRACEY	Petals $5\frac{1}{8}$ " x 2", bronze-yellow, labellum rosy red with yellow veins—July.	8.50
Blc. MERU	Petals 9" x 3", white, with a yellow-chartsreuse throat. Balance all white with exception of lavender spot on lower portion of lip—January.		Lc. ISOTTA	Petals $6\frac{1}{2}$ " x $2\frac{5}{8}$ ", extremely heavy textured petals of lustrous mauve. Isthmus lip of warm ruby purple—August.	
Purpose: Parents both very fine whites, but some color may result from the Blc. Meru parent.			Purpose: Should produce a great variation of colors, predominately yellow, some with isthmus lips. The addition of Isotta parent should add vigor which is certainly desirable in yellow crosses.		
749— Lc. GOLDEN CHARM	Petals $4\frac{3}{4}$ " x $7\frac{1}{8}$ ", a rich X orange throughout—February.	8.50	893— Lc. ATLANTIS	Petals $6\frac{3}{4}$ " x $2\frac{3}{8}$ ", rose magenta, X labellum deep crimson purple—January.	8.50
Lc. MEDON	Petals $5\frac{1}{4}$ " x $2\frac{3}{8}$ ", a lovely rich rose amethyst with dark maroon labellum shading to amethyst purple, yellow veins in throat, exceptionally heavy texture—January.		C. HEYDAY	Petals $7\frac{1}{4}$ " x 3", medium lavender with yellow gold veination in throat of dark lavender labellum—September.	
Purpose: Produce a novelty plant of unusual, good colors and texture. Many unique colors may result from this combination—yellow, bronze and possibly purple.			Purpose: Should produce a winter or spring hybrid of good shape and variation of dark colors.		
850— C. DUPREANA	Petals 8" x $2\frac{3}{4}$ ", medium dark lavender, magenta velvet labellum with X light edge. White to yellow throat with gold eyes, veined throat—June.	8.50	899— Lc. ROSAMUNDE	Petals $7\frac{3}{8}$ " x 3", rich, rose magenta, labellum crimson purple—June.	8.50
Lc. ALTURA	Petals $6\frac{1}{4}$ " x $2\frac{3}{4}$ ", very dark lavender, labellum exceptionally deep magenta. Throat light with a trace of yellow shading to brown—June.		C. TITRIANAE v. CHOLET	Petals 8" x $2\frac{3}{4}$ ", medium lavender, labellum deep mauve, yellow-gold eyes—December.	
Purpose: Dark, heavy textured flower for spring and summer.			Purpose: Fall and winter flowering, should produce vigorous plants of good production. Large, medium to deep lavender flowers on good stems.		
852— C. BOW BELLS v. exquisita	Petals $6\frac{3}{4}$ " x $2\frac{7}{8}$ ", all white with a bright yellow in throat of labellum. X Has exceptionally fine conformation—July.	8.50	Lc. S. J. BRACEY	Used in Crosses Nos. 522, 534, 881	
C. PAVLOVA v. BALLERINA	Petals $6\frac{1}{4}$ " x 2", white, labellum lemon yellow—May.				
Purpose: Should produce a nice white of good shape and texture for summer and fall.					
853— Lc. SUSAN	Petals $8\frac{1}{4}$ " x $3\frac{1}{4}$ ", petals and sepals deep lavender, labellum dark magenta, light yellow eyes in throat—July.	8.50			
Lc. ALTURA	Petals $6\frac{1}{4}$ " x $2\frac{3}{4}$ ", very dark lavender, labellum exceptionally deep magenta, light throat with trace of yellow—June.				
Purpose: Summer and fall flowering. Should have excellent texture and size, medium to dark.					
855— Lc. CARRIE GOLDFARB	Petals $8\frac{1}{4}$ " x 3", medium lavender, very deep magenta labellum with slight trace of white in throat—September.	8.50			
C. PROSPECTOR v. HELEN BUSS	Petals $7\frac{1}{4}$ " x $3\frac{1}{4}$ ", rose lavender, labellum crimson with yellow throat area—March.				
Purpose: Fall to winter, should produce large, well-shaped flowers, medium to dark lavender. Plants should have outstanding vigor.					

Cross No.	Description	Price (Per Pot of 20)
904—Lc. ROSAMUNDE	Petals 7" x 2 7/8", rich, rose magenta, crimson purple labellum—June.	\$12.50
C. TITYUS	Petals 7 1/4" x 2 3/4", rose mauve, labellum large solid crimson purple with yellow throat—January.	
Purpose:	Fall and winter, a vigorous grower, medium to dark lavender flowers with yellow eyes in the throat.	

Cross No.	Description	Price (Per Pot of 20)
937—Lc. MEDON	Petals 6 3/8" x 2 1/4", a lovely rich rose amethyst with dark maroon labellum shading to amethyst purple, yellow veins in throat, exceptionally heavy texture—January.	\$12.50
X		
Lc. ATLANTIS	Petals 8 1/2" x 3", rose mauve, labellum warm crimson purple—October.	

Purpose: An exceptionally heavy textured flower, colors varying from medium to very dark. Variable season.

McLellan Odontoglossum Community Pots

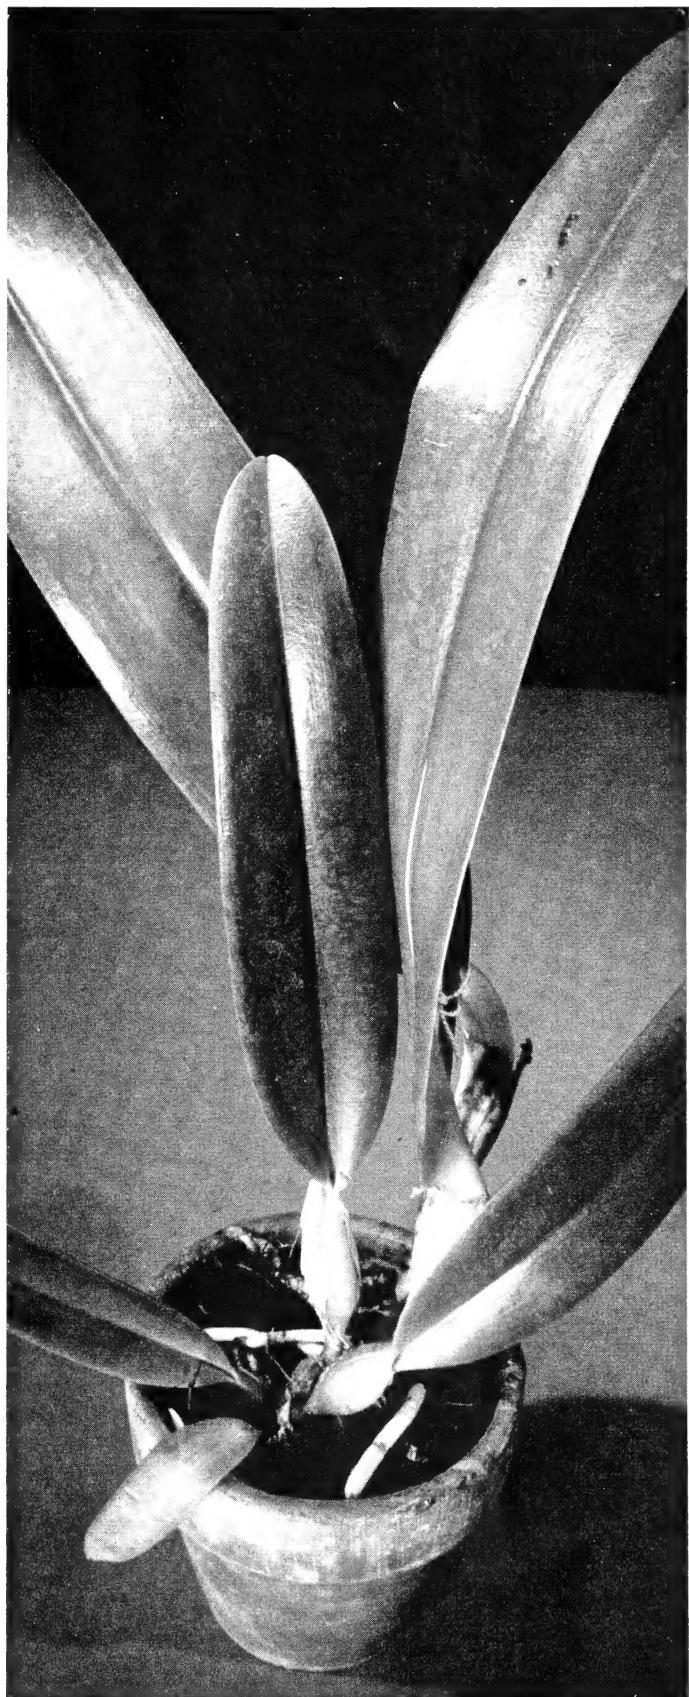

ODONTOGLOSSUM BARAK, a yellow crispum hybrid

Cross No.	Description	Price (Per Pot of 10)
811—ODONTOGLOSSUM DOLABELLA	Petals 3" x 7/8", light purple, with white markings, labellum same as petals with a gold center.	\$ 8.50
X		
ODONTOGLOSSUM NINA	Petals 3 1/2" x 1 1/8", maroon with a lavender and white margin, labellum maroon and white, with gold throats.	
Purpose:	We expect various combinations of purple, maroon and white, with a scattered season, peaking in late winter.	
812—ODONTOGLOSSUM DOLABELLA	Petals 3" x 7/8", light purple, with white markings. Labellum same as petals, with a gold center.	8.50
X		
ODONTOGLOSSUM ESPOIR	Petals 3 1/2" x 1 1/4", maroon with white markings. Sepal and petal tips contrasting white and lavender. Labellum maroon, white and gold.	
Purpose:	This should produce various combinations of white, maroon and purple, with a scattered flowering season.	
832—ODONTOGLOSSUM SIRION	Petals 3 1/4" x 1 1/8", cream with light yellow edging, labellum cream with brown spots, throat gold with maroon markings.	8.50
X		
ODONTOGLOSSUM BEEDING	Petals 2 1/4" x 1", golden yellow with brown spots, labellum light cream yellow with brown markings, throat gold with brown markings.	
Purpose:	A yellow flowered hybrid having varying amounts of brown spotting. Season scattered, winter or spring.	
835—ODONTOGLOSSUM NINA	Petals 3 1/2" x 1 1/8", maroon with a lavender and white margin. Labellum maroon and white with gold throat.	8.50
X		
ODONTOGLOSSUM DIONYZIA	Petals 3 3/8" x 1 1/4", dark red with petals tipped lavender, labellum dark red and white with gold and maroon throat.	
Purpose:	A hybrid with flowers having various combinations of red, maroon, lavender, and white with a scattered season.	
877—ODONTOGLOSSUM BEEDING	Petals 2 1/4" x 1", yellow, heavily marked with red, labellum lighter yellow with red markings and a bright yellow throat.	8.50
X		
ODONTOIODA CARMINE	Petals flamingo red with white edging, labellum similar with gold throat.	
Purpose:	A hybrid having flowers of various shades of yellow and red. Stems are longer in Odontioda crosses, and have many more flowers per stem than Odontoglossum hybrids.	

McLellan Seedlings 1 1/2 and 2 1/4 Inch Pots

Cross No.	Parent Description	Size	Price
C. LADY JOAN —Petals 6 3/4" x 2 1/2", white, X with white labellum, yellow throat—May.	2 1/4"	3.00	
C. ESTELLE alba —Petals 7 1/2" x 2 3/4", white with yellow throat—March.			
Purpose: To produce a white with yellow throat of good size and shape, to flower from early to late spring.			
66—C. ALESSANDRO —Petals 7" x 2 1/2", medium X lavender, labellum purple with light bronze throat—December.	2 1/4"	3.00	
Lc. TREMPEALEAU —Petals 7 1/2" x 2 3/4", rich lavender, labellum crimson purple with gold throat—December.			
Purpose: To produce an extremely vigorous, Christmas season hybrid of good flower color and shape on a satisfactory stem.			
67—C. APALACHEE —Petals 7 1/2" x 2 3/4", medium X lavender, large orange-yellow labellum—December.	2 1/4"	3.00	
Lc. TREMPEALEAU —Petals 7 1/2" x 2 3/4", rich lavender, labellum crimson purple with gold throat—November.			
Purpose: A vigorous, Christmas flowering hybrid, with exceptionally large, dark flowers, yellow throat, excellent shape and good production.			
70—C. NEBO —Petals 6 1/2" x 2 3/4", medium lavender, labellum magenta with yellow X throat—December.	2 1/4"	3.00	
Lc. ELISSA —Petals 7" x 3", rich rose magenta, labellum crimson purple—November.			
Purpose: An excellent growing, good producing medium to dark flowered hybrid for the Christmas season.			
82—(C. DINAH x Lc. MATADOR)—Petals 7" x 2 1/2", X purple splashed, labellum rich rose purple—August.	2 1/4"	3.00	
C. GENERAL PULTENEY v. PERRINI —Petals 7 1/2" x 3 1/8", medium lavender with rich purple stripe, labellum crimson purple with yellow eyes—January.			
Purpose: A large sized, early winter flower with a distinct tendency to have well marked, striped petals of good contrasting colors.			
110—C. H. B. TURNER —Petals 8" x 3 1/2", dark lavender, labellum deep magenta with X ruffled edge and rich gold throat—December.	2 1/4"	3.00	
C. LEDA splendens —Petals 5 1/2" x 2 3/8", rich rose with striped yellow throat—November.			
Purpose: An extraordinary heavy producing Christmas hybrid of good color.			
115—Lc. ATLANTIS —Petals 8" x 3 1/8", dark lavender, labellum crimson purple with X yellow throat—January.	2 1/4"	4.00	
Lc. ATLANTIS —Petals 8 1/4" x 3 1/8", rose magenta with darker center stripe, labellum and throat velvety crimson purple—February.			
Purpose: To produce a superb strain of dark colored, productive hybrids, flowering in late fall and winter, from which to select parents for future breeding.			

A McLellan Unflowered Seedling

Cross No.	Parent Description	Size	Price	Cross No.	Parent Description	Size	Price
118—Lc. CHEVALIER —Petals 8" x 3", dark lavender, labellum crimson purple—X April.		2 1/4"	\$ 4.00	172—C. PRISCILLA alba —Petals 8 1/4" x 2 7/8", pure white tipped with purple, X labellum violet purple with yellow throat—May.		2 1/4"	\$ 4.00
Lc. ATLANTIS —Petals 8 1/4" x 3 1/8", rose magenta, labellum deep crimson purple—January.				C. BRUSSELS alba —Petals 8" x 2 3/4", pure white, labellum purple with large yellow area extending into throat—April.			
Purpose: A distinct improvement over present day spring blooming hybrids as to color, shape and growing characteristics.				Purpose: A good producing, strong growing white hybrid with colored lip, for winter and spring.			
133—C. MOSSIAE v. HAGER —Petals 8 1/2" x 2 7/8", X medium lavender, labellum ruffled, dark Mossiae type—May.		2 1/4"	3.00	174—C. MOSSIAE —Petals 8 1/2" x 3", rose lavender, labellum rose purple with X mauve edging and gold throat—April.		2 1/4"	3.00
Lc. ATLANTIS —Petals 8 1/2" x 3", deep rose magenta, labellum rich crimson purple—January.				C. H. B. TURNER —Petals 8" x 3 1/2", dark lavender, labellum deep magenta with ruffled edge and rich gold throat.			
Purpose: A spring flowering, well shaped hybrid, better colored than average.				Purpose: A cross of high merit in both production and season, which extends from February to May.			
138—C. MRS. FREDERICK KNOLLYS alba —Petals X 8" x 3", white, labellum purple with yellow throat—April.		1 1/2"	1.50	175—C. ANGELUS —Petals 5 1/4" x 1 3/4", pure X white, labellum pale yellow—May.		2 1/4"	3.00
C. BRUSSELS —Petals 9 1/4" x 2 3/4", white, labellum purple with white ruffled edge and yellow throat—March.		2 1/4"	4.00	C. ESTELLE alba —Petals 7 3/4" x 2 3/4", pure white, labellum white with orange throat—March.			
Purpose: A good growing white, with colored lip, for the spring season.				Purpose: A medium sized, heavy textured white cattleya for the spring season.			
144—Lc. BRITANNIA —Petals 7 3/4" x 3", lilac mauve, labellum rich royal purple, with old gold throat veining—April.		2 1/4"	4.00	176—C. SAN PASQUAL —Petals 8" x 2 7/8", deep X magenta with very large crimson purple lip, gold eyes—June.		2 1/4"	3.00
Lc. ATLANTIS —Petals 8" x 3 1/8", medium lavender, labellum rich reddish purple—March.				C. VARUNA —Petals 8 1/4" x 3 1/8", deep rosy mauve, labellum darker rosy mauve—August.			
Purpose: A large, well formed dark flower with rich dark labellum, having gold veining in the throat. We expect vigorous growth with a variable spring and summer flowering season.				Purpose: An extraordinary strong growing, early summer hybrid, producing an abundance of large dark colored flowers.			
159—C. CREPUSCULE —Petals 7 3/4" x 2 1/2", glowing crimson purple, frilled ruby purple labellum with golden throat—June.		2 1/4"	3.00	178—Lc. SUSAN —Petals 8 1/4" x 3 1/8", deep lavender, labellum dark magenta, X light yellow eyes in throat—July.		1 1/2"	1.50
C. intertexta —Petals 8 3/4" x 2 1/2", flower is deep wine color throughout, richest on the lip—May.				C. J. A. CARBONE —Petals 7 1/4" x 2 3/4", dark lavender, labellum medium lustre with light colored fringe, and a few yellow lines in throat—May.			
Purpose: A good producing, late spring hybrid of intense color and excellent texture.				Purpose: A large-sized, good colored flower for the spring season.			
163—C. PRISCILLA alba —Petals 8" x 2 1/2", white, X labellum purple with yellow throat—May.		2 1/4"	4.00	184—C. VARUNA —Petals 7 1/2" x 2 7/8", entire flower dark magenta, labellum X a shade darker than the rest of the flower—September.		1 1/2"	2.00
C. MRS. FREDERICK KNOLLYS alba —Petals 8" x 3", white, labellum purple with yellow throat—May.				Lc. CARRIE GOLDFARB —Petals 6 3/4" x 3", medium lavender, very dark magenta labellum with slight trace of white in throat—September.			
Purpose: A large flowered white, with colored labellum for winter and spring season.				Purpose: To improve the growth habit of Lc. Carrie Goldfarb. Cattleya Varuna is an exceptionally good grower.			
168—Lc. CABAZON —Petals 6 1/2" x 2 3/4", rose lavender with crimson shading X toward the tips, labellum ruby crimson, yellow throat—May		2 1/4"	3.00	221—C. LEDA splendens —Petals 6" x 2 1/4", rich rose magenta, labellum reddish X purple with yellow throat—November.		1 1/2"	1.50
C. MOSSIAE —Petals 9" x 3", clear mauve, labellum purple with yellow gold throat—April.				Lc. ATLANTIS —Petals 8 1/4" x 3 1/8", rose mauve, labellum warm crimson purple—October.			
Purpose: A good quality flower of fine shape with the production and growth of C. Mossiae. Expect spring flowering, with some variations.				Purpose: A good producing, dark-colored flower for the late fall and early winter.			
170—C. VARUNA —Petals 7 1/4" x 2 1/2", rose purple, labellum deeper rose purple—August.		2 1/4"	3.00	241—C. APALACHEE —Petals 7" x 2 3/4", medium X lavender, labellum magenta and gold—December.		1 1/2"	1.50
C. CREPUSCULE —Petals 7 3/4" x 2 1/2", glowing crimson purple, frilled ruby purple labellum with golden throat—June.				Lc. ATLANTIS —Petals 8 1/2" x 3", deep rose magenta, labellum rich crimson purple—January.			
Purpose: A strong growing, exceptionally dark, colored cattleya for early summer.				Purpose: A dark flowered, well-shaped hybrid for the Christmas season. The flower stem and plant vigor should be exceptional.			

Cross No.	Parent Description	Size	Price
272—C. NEBO	Petals 6 1/4" x 2 3/4", medium lavender, labellum magenta with yellow throat—December. X	1 1/2"	\$1.50
Lc. TREMPEALEAU	Petals 7 1/4" x 2 7/8", rich lavender, labellum crimson purple with gold throat—November.

Purpose:	A winter blooming pure white of excellent size and production.		
304—Lc. CABAZON	Petals 7 1/2" x 2 7/8", medium lavender, labellum rich magenta with gold throat—January. X	1 1/2"	1.50
C. NEBO	Petals 6 3/4" x 2 5/8", medium lavender, labellum magenta with orange-yellow throat—December.		
Purpose:	A good textured hybrid for the early winter.		
319—C. SIR PERTINAX	Petals 8 1/2" x 2 7/8", medium lavender, labellum rose magenta with yellow throat—February. X	1 1/2"	1.50
Lc. ATLANTIS	Petals 8" x 3", rose mauve, labellum crimson purple—April.		
Purpose:	A very vigorous, good colored hybrid for the winter season.		
350—C. TITYUS	Petals 7 1/4" x 2 3/4", rose mauve, labellum bright purple with golden yellow throat—March. X	1 1/2"	1.50
C. NEBO	Petals 7 3/8" x 2 3/4", medium lavender, labellum magenta with yellow throat—December.		
Purpose:	To make C. Bandit, which is an extremely satisfactory, early winter hybrid of large size and color.		

C. TELLUS—Used in Crosses Nos. 273, 704

Cross No.	Parent Description	Size	Price
367—C. PROSPECTOR v. HELEN BUSS	Petals 7 1/4" x 3 1/4", rose lavender, labellum crimson with yellow throat area—March. X	1 1/2"	\$ 1.50
C. TITYUS	Petals 7 1/4" x 2 3/4", rose mauve, labellum bright purple with golden throat—March.		
Purpose:	To make C. Pilgrim, a very satisfactory flower for late winter and early spring production.		
369—C. VARUNA	Petals 7 1/2" x 2 3/4", entire flower dark magenta, labellum a shade darker than the rest of the flower—September. X	1 1/2"	1.50
C. PROSPECTOR v. HELEN BUSS	Petals 7 1/4" x 3 1/4", rose lavender, labellum crimson with yellow throat area—March.		
Purpose:	To produce a new, darker C. Prospector type hybrid, which is noted for its productivity and vigor. The season will be variable, peaking in the winter.		
372—Lc. MEM. HELENE AMMENHEUSER	Petals 7 1/4" x 3 1/8", rose lavender, labellum rich purple with yellow throat—March. X	1 1/2"	1.50
Lc. MIRABELLE	Petals 7 1/2" x 3 1/4", rose mauve, labellum crimson purple with cream yellow side zones—November.		
Purpose:	A large, dark-flowered, winter blooming hybrid of vigorous growth habit.		
373—C. TALISMAN	Petals 7 1/4" x 2 5/8", rose lavender, labellum rich magenta with good yellow throat—March. X	1 1/2"	1.50
Lc. ATLANTIS	Petals 8 1/4" x 3 1/8", rose magenta, labellum deep crimson purple—January.		
Purpose:	A strong growing, winter blooming hybrid, producing good textured, dark flowers.		
380—Blc. MOMERCIA	Petals 6 1/4" x 2 3/4", deep rose lavender, labellum crimson purple with golden throat—March. X	1 1/2"	1.50
C. PROSPECTOR	Petals 7" x 3", rose lavender, labellum rose magenta with light margin and a yellow throat—March.		
Purpose:	An exceptional, good quality flower for the early spring season that will resemble the Laeliocattleya, rather than the Brassocattleya.		

Cross No.	Parent Description	Size	Price	Size	Price
390—C. MOSSIAE	Petals 7 1/4" x 2 1/2", medium lavender, labellum rose purple X with mauve edging and yellow throat—April.	1 1/2"	\$ 1.50	473—Lc. NYMPH	Petals 8 1/2" x 2 3/4", rose lavender, labellum rich magenta X with yellow throat—June.
Blc. MOMERCIA	Petals 6 1/4" x 2 3/4", deep rose lavender, labellum rich crimson purple with golden throat—March.			Lc. CABAZON	Petals 6" x 2 3/4", rich rose magenta, labellum rich crimson purple and golden throat—June.
Purpose:	A hybrid to replace C. Mossiae, this should have considerably more color, and improved texture.			Purpose:	A really fine hybrid with a scattered season, peaking in June. Flowers should be outstanding on good stems.
398—C. MOSSIAE	Petals 7 3/4" x 2 3/4", rose lavender, labellum rose purple X with yellow orange throat—April.	1 1/2"	1.50	476—Lc. ROSAMUNDE	Petals 8 3/4" x 3", rich rose magenta, labellum crimson purple—June.
Lc. CUESTA	Petals 7" x 2 3/4", rose magenta, labellum deep crimson purple—February.			Lc. CABAZON	Petals 6 1/2" x 2 3/4", rich rose lavender, labellum crimson purple with gold throat—May.
Purpose:	A late winter and early spring hybrid; both parents are very fine types.			Purpose:	Fine color, quality and shape should result from this laeliocattleya combination. Expect a scattered season of bloom peaking in early summer.
409—C. MONMOSS	Petals 7" x 3", medium X lavender, labellum dark magenta with gold throat—April.	1 1/2"	1.50	481—C. BEN NEVIS	Petals 9" x 2 3/4", pure white with white labellum, gold X eyes and throat, some veining—June.
Lc. MEM. HELENE AMMENHEUSER	Petals 7 1/4" x 3 1/8", rose lavender, labellum rich purple with yellow throat—March.			C. BARBARA BILLINGSLEY	Petals 7 3/4" x 2 3/4", white petals and labellum, orange eyes in throat—March
Purpose:	A hybrid of much better size, color and texture than C. Mossiae, which will equal the production of the C. Mossiae during the same season.			Purpose:	A white cattleya with yellow throat for the late winter and spring season.
433—C. COWANIAE	Petals 10" x 3 1/4", medium lavender, labellum gold X overlaid with magenta in the ruffled margin—May.	1 1/2"	1.50	484—C. PORTOLA	Petals 7 1/2" x 2 7/8", lavender with magenta velvet labellum, creamy gold eyes in throat—June.
Lc. ATLANTIS	Petals 8 1/4" x 3 1/8", rose magenta with darker center stripe, labellum and throat velvety crimson purple—February.			Lc. CABAZON	Petals 6" x 2 3/4", bright, dark lavender, red-violet velvet labellum, clear yellow gold eyes and veins in the throat—June.
Purpose:	A late winter and early spring hybrid to replace C. Mossiae.			Purpose:	A fine, richly-colored cattleya for late spring and early summer.
435—C. COWANIAE	Petals 9 1/2" x 3 1/4", medium lavender, labellum magenta X with golden orange throat—May.	1 1/2"	1.50	522—Lc. S. J. BRACEY	Petals 6 3/4" x 2 1/2", bronze-yellow, labellum crimson X purple—July.
Blc. MOMERCIA	Petals 6 1/4" x 2 3/4", deep rose lavender, labellum rich purple with golden throat—March.			C. TRIUMPHANS	Petals 6" x 2 1/4", creamy yellow, labellum crimson purple—July.
Purpose:	A fine textured hybrid for the spring season.			Purpose:	A good novelty laeliocattleya, producing good textured yellow and bronze flowers in the summer and fall. The seedlings are fine growers.
440—C. PAVLOVA v. BALLERINA	Petals 6 1/4" x 2", pure white, labellum lemon yellow—May.	1 1/2"	1.50	534—Lc. S. J. BRACEY	Petals 6 3/4" x 2 1/4", yellow gold with red veining, X rosy magenta labellum and gold eyes in throat—September.
C. BARBARA BILLINGSLEY	Petals 8" x 3", pure white, labellum ruffled white with clear golden throat—January.			Lc. YASMIN	Petals 7 1/4" x 2", red-bronze with magenta labellum—May.
Purpose:	A well-shaped, excellent textured, white cattleya, with a scattered season from Christmas to Easter.			Purpose:	A novelty cross, this will have yellow, peach, bronze, and magenta shades. The seedlings are good growers, and should produce well. Season will be extended possibly over six months.
454—C. CONCINNITY	Petals 7 3/4" x 2 7/8", pure white, labellum white with a light orange throat—May.	1 1/2"	1.50	625—C. HERMOSA	Petals 7" x 2 5/8", dark lavender, labellum has magenta center with lighter margin, small X dull gold eyes, creamy veins in throat, which has a maroon base—November.
C. BARBARA BILLINGSLEY	Petals 6 3/4" x 2 7/8", pure white, labellum white with orange throat—March.			Lc. MIRABELLE	Petals 7 1/2" x 3 1/4", medium petals with darker labellum, yellow eyes on a dark throat—November.
Purpose:	A pure white cattleya producing and growing exceptionally well for the winter and spring season.			Purpose:	A late fall and early winter medium to dark flower, with good growth habits.
464—C. COWANIAE	Petals 7" x 2 3/4", medium X lavender, magenta labellum with yellow throat—May.	1 1/2"	1.50	721—C. APALACHEE	Petals 7" x 2 3/4", medium lavender, large orange-yellow labellum—December.
Lc. CABAZON	Petals 6 3/4" x 3", lavender petals, magenta labellum with yellow eyes in throat—May.			Lc. HERTHA	Petals 7" x 2 3/4", light lavender with magenta velvet labellum, gold eyes and veins in throat—June.
Purpose:	A large well-colored flower with a scattered season.			Purpose:	All crosses made with Lc. Hertha have good color and texture, with remarkable shape.

McLellan Unflowered Seedlings

Unflowered seedlings of our own crosses, these plants are only a year or two away from blooming. Many, however, will flower on their next growth. They offer an excellent opportunity to improve your collection at a comparatively small cost, a program which is being adopted by many growers.

Cross No.	Parent Description	Size	Price	Cross No.	Parent Description	Size	Price
3—C. LILLIAN STEWART —Petals $5\frac{3}{4}'' \times 2\frac{5}{8}''$, white, labellum white with deep yellow throat—November.	X yellow throat—November.	3" 4"	\$ 5.00 8.00	20—C. NATALIE DEKENS —Petals $5\frac{3}{4}'' \times 1\frac{3}{4}''$, white, labellum white with very pale yellow throat—April.	X pale yellow throat—April.	3" 4"	\$ 5.00 8.00
C. ESTELLE alba —Petals $7'' \times 2\frac{1}{2}''$, white, labellum white with yellow-orange throat—November.				C. ESTELLE alba —Petals $7\frac{1}{2}'' \times 2\frac{3}{4}''$, white, labellum white with yellow throat—March.			
Purpose: To produce a pure white, winter blooming cattleya with vigorous growth habits.				Purpose: An excellent textured, clear white with yellow throat. Flowers winter through spring; expected to be good producer, with vigorous growth and excellent keeping qualities of C. Estelle alba.			
4—C. LEDA splendens —Petals $5\frac{1}{4}'' \times 2''$, rich rose magenta, labellum reddish purple with yellow throat—November.	X	3" 4"	5.00 8.00	25—C. PAVLOVA v. BALLERINA —Petals $6\frac{1}{4}'' \times 2''$, white, labellum lemon yellow—May.	X	3" 4"	5.00 8.00

Flowering-Size Plants

Each plant's flowering history is recorded on an accompanying label.

What does this label mean?

This label which is marked 6/15/49 3 #2 means that three flowers of #2 grade were cut June 15, 1949. A date without a flower record indicates the repotting time.

How we grade:

The width of the flower indicates the grade of the plant:

Up to 5"	Spread	No. 4
5" to 5 3/4"		No. 3
5 3/4" to 6 1/2"		No. 2
6 1/2" and larger		No. 1

OUR PRICES ARE BASED ON THE SIZE AND QUANTITY OF THE BLOOMS, THE SIZE OF THE PLANT, AND THE NUMBER OF LEADS.

Here is a selection to tempt the orchid enthusiast, large or small.

NOTE: When two prices are shown opposite a pot size, intermediate prices frequently are available. IT WILL SAVE TIME IN FILLING YOUR ORDER IF YOU WILL STATE THE RANGE OF PRICES ACCEPTABLE TO YOU IN THE VARIETY AND POT SIZE YOU PREFER.

C. VARUNA—A Vigorous Grower for Fall and Winter Blooms

Name	Parentage and Description	Size	Price

Limited Offering

These plants are the same as the preceding ones in all respects excepting that we priced them somewhat lower, since they are available in only one or two plants in each size and kind, as listed. Thus, for this group only, a second choice should be made for each selection in the event that the plant you first select has already been sold.

Cypripediums

These plants bear blooms unequaled in keeping qualities, both on the plant and as cut flowers.

Their temperature requirements permit a great deal of leeway for the amateur grower, as the plant will grow quite successfully in night temperatures ranging from 55 to 70 degrees. All plants listed have been flowered.

Name	Parentage and Description	Size	Price
Cyp. callosum (species)	The foliage lovely mottled green. Dorsal sepal is white shaded to green at its base and striped with dark crimson. Petals pale green and pouch brown-purple.	5"	\$ 7.50 - \$12.00
Cyp. MAUDIAE v. magnificum, F. C. C., R. H. S. (callosum Sanderae x Lawrenceanum, Hyeanum)	Universal favorite because of its lovely mottled green foliage and fine green and white long stemmed flowers.	3"	10.00
		4"	15.00
Cyp. SAINT ALBAN (<i>Antigone</i> x <i>Harri-sianum</i>)	Exciting medium sized flower with deep mahogany red pouch and petals. Dorsal sepal has mahogany red sunrise shading to white at sides and top.	3"	7.50
		4"	10.00

CYPRIPEDIUM CALLOSUM

Name	Parentage and Description	Size	Price
Cyp. villosum (species)	Vigorous species with pouch and petals of yellow brown and dorsal sepal of brownish purple shaded with green.	4"	\$5.00
		5"	7.50

Epidendrums

These are new colors in epidendrums, unobtainable before, and are compact growers compared to the usual. The delicate interesting shades were created as a result of years of hybridizing. Flowers are from $\frac{3}{4}$ to 1 inch in diameter, and are borne in clusters, as in the photograph to the left. They appreciate a great deal of sun, and are quite easy to grow.

4" Plants \$6.00 5" Plants \$7.50

These hybrids are available in the following colors:

Tangerine	Coral Red	Fuschia Rose
Coral Rose	Rose	Yellow Gold

Dendrobium Species

We are offering a small group of these popular natives of the Far East. Easily grown, they offer a fine variety of different types of flowers. Some are in clay pots, others on tree fern slabs, and we ask that you designate which you prefer when you order. Pot sizes range 3", 4" and 5", with most of the 5" pots being quite tall plants.

There is not a complete range of size and price for every plant, and we suggest that you tell us what price and size range would be acceptable to you when you order.

3" Plants: \$5.00 4" Plants: \$7.50 5" Plants: \$10.00

Name and Description

Den. DRACONIS—Flowers pure white, the lip stained with red, usually measures 1 1/2" across—spring and summer.

Den. FARMERI—Straw yellow with a pink blush, golden yellow lip—spring.

Den. fimbriatum v. ocellatum—Rich golden yellow, with dark red spot at base of the lip—spring, variable.

Den. formosum v. giganteum—Large, pure white, except for orange-yellow stain in labellum. Very fragrant—autumn.

Den. HILDEBRANDII—Pale yellow with orange and yellow lip—spring.

Den. infundibulum—Flowers borne in clusters about 4" across, pure white with yellow lip and throat—spring.

Den. moschatum—Yellowish petals and sepals tinted with pink, lip yellow with two darker spots at base—spring and summer.

Den. PARISHII—Rich dark rose, two purplish blotches in throat—spring.

Den. PIERARDII—Blush white, suffused with rose, yellow lip with dark purplish veins—winter and spring.

Den. primulinum—Sepals and petals pale rose lilac, lip spreading primrose yellow streaked with red at the base—early spring.

AN EPIDENDRUM IN BLOOM

Den. pulchellum (Syn. Dalhousieanum)—Sepals and petals tawny yellow, shaded with rose, labellum has two crimson spots—spring.

Den. superbiens—Rich magneta—autumn, variable.

Cymbidiums

These are the terrestrial orchids which throw spikes from 8 to 30 flowers to a spike, that keep from one to three months. The plants flower from the middle of the winter to early spring—a beautiful cymbidium in bloom is the highlight of any mid-winter garden.

Pricing is done in the usual manner at \$1.00 to 10.00 per bulb, depending upon the variety and quality of the flower. We expect from 1 to 2 flower spikes each winter in the 6" to 8" pots, 2 to 4 spikes in the 9" to 10" pots, and 3 to 8 spikes in the 12" to 14" pots, depending upon the variety.

We also have a group of unnamed, garden-type cymbidiums for the West Coast fancier, which should include such types as insigne, Pauwelsii, Ceres, Lowianum and grandiflorum.

Pot Size	Price
6" to 10"	\$10.00 - \$25.00

Anthuriums

These unusual plants of great beauty will give you almost continual blooms throughout the year, for they last months, either on the plant, or cut. Most orchid collectors like to have one of these exotic plants in their collection to ensure having a bloom at times when the orchid plants are "between flowers."

Anthuriums range in color from pure white to a very deep red, with lovely foliage that is, in itself, an attraction.

MATURE PLANTS

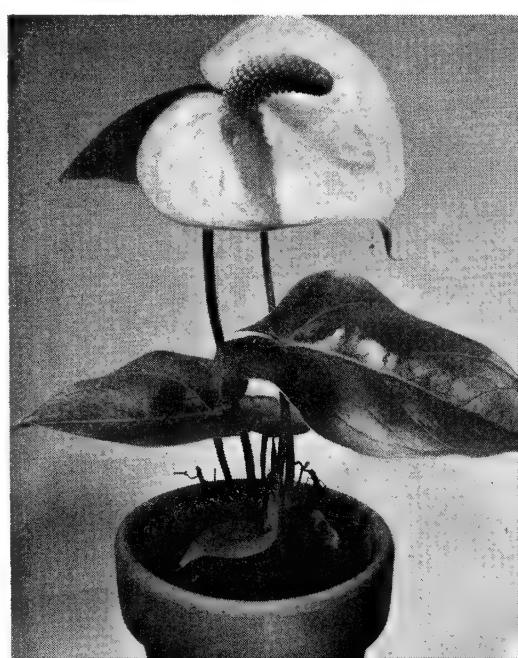

Good quality plants ranging in color from light pink to a nice red:

5"	\$ 7.50	5"	\$10.00
6"	9.00	6"	12.00
7"	10.50	7"	14.00
8"	12.00	8"	16.00

Exceptional plants which include pure whites and outstanding reds:

3"	\$3.00	4"	4.00
----	--------	----	------

ANTHURIUM

The Care of Orchids in the Home

More and more indoor gardeners are finding they can grow orchids in their modern, evenly heated homes with less trouble than most so-called "house plants."

The information which follows is general in nature, as indeed it must be, since there are thousands of different types of orchids. For the most part, it pertains to the "cattleyas," the most popular and well-known orchid, which you have seen in corsages many times. Where it does not, it is so noted.

From the time pollination takes place, it requires seven years approximately to produce a mature, flowering-size plant. The seed will take about one year to develop in the seed pod upon the plant. It is then planted under absolutely sterile conditions in a flask, or glass bottle, containing a nutrient agar solution. Here the seeds, hundreds of them to a bottle, will sprout into tiny seedlings. This takes about another year, after which the tiny seedlings are transplanted to "community" pots, ten, twenty, or more seedlings to each pot, where they grow for another year.

They then progress into successively larger pots, 1½" (thumb pots), 2¼", 3" and 4" at about yearly intervals. Plants will usually flower when they reach the 4" stage, about seven years from pollination.

After the plants reach maturity, they usually remain in the same pot for about two years, after which time they are "repotted." Your orchids are potted in a special material, usually "osmunda," dried fern roots, if they are epiphytes (i.e. cattleyas) or some combination of special materials if they are semi-terrestrial or terrestrial (i.e. cymbidiums).

Although no absolute rules can be written for orchid culture in such a limited space, since you are working with a living thing, the following suggestions will serve as a general guide for your culture:

LOCATION: Try to give orchid plants a position near a window with as much light as possible, providing there is positive protection against DIRECT MID-DAY SUN. Plants while in bloom can be placed anywhere at your pleasure, even in dark hallways.

WATERING: Water once a week with one cup of water for a 5-inch pot, and proportionately more for larger pots. During hot summer days, watering may be increased. Orchid plants must be permitted to dry out to some degree between waterings or the roots will change from the healthy white or greenish color to a brown, and die. Thus, do not permit the pot to rest in a saucer or bowl of water.

TEMPERATURE: Cattleyas like the usual comfortable, ordinary home temperatures.

Odontoglossum do well in the cooler rooms, in the cool conservatory or sheltered porch.

Cymbidiums can stand more cold than any orchid. In the San Francisco area, cymbidiums flourish in shady or protected gardens, in large pots in protected patios, or in unheated glasshouses.

HUMIDITY: Plants may be set on pebbles placed in an ordinary tray or flat bowl with water. These pebbles help to give added humidity by the evaporation of water kept about them. It is important that the water level be **below** the surface of the pebbles on which the pot rests, and at least one inch should be allowed between the level of water about the pebbles and the bottom of the pot.

The following books contain more detailed information on orchid plants, and have been published within recent years. Most of these you may obtain at your local book stores, and if not, we will be glad to supply them:

ORCHIDS ARE EASY TO GROW (Logan & Cosper)	\$6.00 postpaid
HOME ORCHID GROWING (Rebecca T. Northen)	6.00 postpaid
AMERICAN ORCHID CULTURE (Edward A. White)	6.00 postpaid
ABC OF ORCHID GROWING (John V. Watkins)	3.00 postpaid

Suggested List for Beginners

We have selected these plants particularly for the beginner, although of course, anyone may select them. Most of them are "species," or non-hybridized plants. Because of their well defined flowering period, wealth of bloom, and their definite characteristics, species should be the foundation of every beginner's collection.

All of these plants are vigorous growers, and can be grown successfully in the home where no greenhouse is available, since they thrive at temperatures most comfortable to human beings.
